## ***Do you train a tracker, detector or search dog?***

The *Canine Scent Work Log* is a new tool for handlers of scenting dogs. Documentation of training is fast and thorough with the Log's data entry prompts, mapping diagram and comment space. The self-built table of contents allows trainers to quickly review a dog's testing versus training ratio. The Log features a weather resistant cover page, is wire-bound to lay flat and sized at 5.5 x 8.5 inches to fit standard planner covers.

Keeping a detailed record of scent work, starting with the dog's first experience, helps make an efficient and skilled trainer. The Log makes it easy to review progress, identify problems, and modify training. Handlers working multiple dogs should use a separate Canine Scent Work Log for each dog.

### The Log includes:

- ✓ instructions
- ✓ sample entries
- ✓ templates for 75 sessions

### **FOR PROFESSIONALS, VOLUNTEERS AND SPORT DOG TRAINERS**

Whether you train military or law enforcement patrol or detector dogs, search dogs working in avalanche, wilderness or disaster scenarios, or aim for Schutzhund or AKC tracking titles, the *Canine Scent Work Log* enables more focused training.
